#### SECTION 2

#### LIMITATIONS

#### 2.1 GENERAL

This section provides the "FAA Approved" operating limitations, instrument markings, color coding and basic placards necessary for the operation of the airplane and its systems.

This airplane must be operated as a normal or utility category airplane in compliance with the operating limitations stated in the form of placards and markings and those given in this section and this complete handbook.

Limitations associated with those optional systems and equipment which require handbook supplements can be found in Section 9 (Supplements).

#### 2.3 AIRSPEED LIMITATIONS

SPEED	KIAS	KCAS
Never Exceed Speed ( $V_{\mbox{\scriptsize NE}}$ ) - Do not exceed this speed in any operation.	154	148
Maximum Structural Cruising Speed $(V_{NO})$ - Do not exceed this speed except in smooth air and then only with caution.	125	121
Design Maneuvering Speed (V <sub>A</sub> ) - Do not make full or abrupt control movements above this speed.  At 2550 LBS. G.W.  At 1634 LBS. G.W.	113 89	111 89

#### CAUTION

Maneuvering speed decreases at lighter weight as the effects of aerodynamic forces become more pronounced. Linear interpolation may be used for intermediate gross weights. Manuevering speed should not be exceeded while operating in rough air.

Maximum Flaps Extended	Speed (VFE) - Do not exceed	
this speed with the flaps ex	ctended.
